

## Creating for Fun (no experience necessary)

The classes offered here are just like the title, they have been created to have fun while learning to make jewelry. You do not need experience, through it is always helpful.

All the tools and materials will be provided for the class. However, I always encourage students to bring their own tools to learn with if they have them available.

If you would like the cost of a class, please contact me. The price of materials has been changing at a crazy rate. Contact me and I can give you the current price for the classes you are interested in.

### Simple Stack Rings

In this class we will use sterling silver wire to create stackable rings. Learn how to shape basic rings out of wire, size them, solder them using silver solder and give them a hammered texture and shiny finish.

### Sparkle Earrings

Learn the basics of making wire wrapped connections and drops. By integrating beads, we add color and sparkle to the earrings. This kit is available in both copper or silver.

### Riveted Pendants

We will cut, shape and texture metal and then create rivets from wire to connect the accents to the pendants. Beads can be added for extra sparkle. This kit is available in both copper or silver.

### Torch and Hammer Earrings

A hammer and a torch are the two main tools of this technique called 'fold forming'. Copper lends itself well to this technique as it is very forgiving to with repeated torch work. You will learn the basic properties of the metal that will allow you to create folds in the metal for texture and shaping.

### **Torch and Hammer Cuff Bracelet**

A hammer and a torch are the two main tools of this technique called 'fold forming'. Copper lends itself well to this technique as it is very forgiving to with repeated torch work. You will learn the basic properties of the metal that will allow you to create folds in the metal for texture and how to shape a cuff bracelet.

### **Hammered Earrings**

Cut, texture and shape metal to create interesting earring drops. These can be used for earrings with or without beads to add some sparkle. This kit is available in both copper or silver.

### **Statement Hoop Earrings**

Cut and texture metal that can be shaped into hoops. They are attached to ear wires and decorated with a wire wrap to give them a finished look. This kit is available in both copper or silver.

### **Paddle Earrings**

The hammer is the star in creating these earrings. By hammering and shaping the ends of the wire we create paddles that can be used in creating earrings. This kit is a mixed metal kit of copper and sterling silver.
